

Summary of WGs: *calibration targets & calibration management*

Calibration management

Definition of cal. accuracy: provide *ability to utilise Poisson statistic in data*

Question: *How to discourage publication of wrong science results?*

Define model to do good calibration

- Documentation archive in “calibration data model” (currently FITS)
- Establish better (formal) link between agency and instrument teams
- Calibration should be part of QA
- Provide recommendation for proper calibration
 - list of targets
 - recommendations of other WGs
